Our Philosophy and Mission

We stand by Dr. Maria Montessori's original philosophy, "follow the child." As a Montessori school, we provide a loving and nurturing environment where children can thrive and we believe children learn in different ways and at different rates. Each child advances through the curriculum guided by teachers, and by following an individualized learning plan. By allowing the child to learn at their own pace, he or she is able to develop independence, motor skills, coordination, concentration, language, and sensorial skills. Our small, mixed-aged classrooms support the fundamentals of the Montessori philosophy, re-creating family structure. Older students enjoy being role models and learning responsibility whilst the younger children feel supported and gain confidence through their peers. These traits are the building blocks in kindness, leadership, respect, and patience.

我们的理念和目标

我们幼儿园遵循蒙特梭利教育理念，主张“追随儿童”。作为蒙特梭利学校，我们尊重儿童，准备好以儿童为中心的环境，激发孩子的创造力。经过老师的引导，孩子通过自我探索和自己动手来锻炼独立性、协调性、专注力、对世界的认知，并在这个环境中，培养出良好的社交能力和表达力。在蒙特梭利混龄的环境中，孩子们互相帮助、学习、交流，帮助自己成长。在真实的环境中，在专业老师的引导下，让每个孩子都成为自信、独立思考、有爱心、有责任感的终身学习者。

Our Program

Toddler Program (18 months - 3 years old)

小班课程

The toddler program recognizes that children learn by doing. The school provides the children with well-ordered, carefully and purposefully prepared environment in which they are respected and contributing members of a mini community. Dedicated and well-trained teachers implement a toddler curriculum to foster gross motor skills and fine motor skills, cognitive development, and thrive for independence. We are very aware of the importance of language development for toddlers. The children participate in activities to help them develop their speaking and listening skills, and to help them expand their vocabulary.

小班课程面向 18 个月到三岁的幼儿。这个年龄段的孩子对身边的一切充满兴趣，通过自己动手来学习和发展自己。专业的、有爱心的老师们准备好有序、温馨、安全的环境，设计适合这个年龄段的活动和课程，促进幼儿的认知发展、手眼协调的锻炼，以达到独立性。同时，我们也很重视这个阶段儿童的语言能力的发展，增加词汇量，锻炼幼儿的语言表达和理解力。

Early Childhood Program (3 - 6 years old)

大班课程

Our Montessori Early Childhood curriculum has four main areas: Practical Life, Sensorial, Language and Mathematics. We also place considerable emphasis on Cultural Studies, Science, Creative and Practical Arts, Music, History and Geography. Children from the age of three continue the process of self-construction, consolidating, refining and adding to the skills and knowledge they accumulated before the age of three. Our environment here at Montessori Academy provides the children with motives for activity through which they refine their language, movement, perception, and become independent children who are prepared for life.

三岁以上是儿童自我建构、提升技能和获得知识的重要阶段。孩子从环境、蒙特梭利教具，与老师、同学之间的互动中得到锻炼和提高。除了日常生活、感官、语言和数学方面，我们也非常重视文化、科学、艺术、音乐、历史、地理等方面的知识融入和熏陶。在专业的蒙特梭利老师的指导下，孩子们依其发展的节奏和需求，在语言、肢体协调、自信心、专注力、社交能力等方面进行建构性的学习，为儿童的一生做好准备。

Working with Families

家园共育

We place a high value on communication and cooperation with parents. Parents play an irreplaceable and important role in child's education, especially in early childhood stage. Our school offers classroom observation, parent-teacher conference, communication book and newsletter to enhance the mutual understanding. And our school has regular parent workshop to share education tips with our parents. We need parents deeply engaged. Your trust, cooperation, encouragement and support are highly valued. We believe that we can build a beautiful childhood together for your child.

我们学校非常重视和家长之间的交流和合作。父母在孩子的成长过程中起着至关重要且不可取代的作用，尤其在儿童学前阶段。学校邀请家长进行教室观察，举行家长会，每个孩子都有自己的成长记录册。家长可以通过在线平台、电子邮件、电子杂志、网站微信等渠道更深入的了解孩子在园所的成长历程和美好时刻。学校还定期为家长们举办家长课堂及讲座，分享更多积极的育儿知识。在家长的信任、合作、鼓励和支持下，学校和家长一起努力，给孩子提供最美好的童年时光。
